## Frequently Asked Questions

[Help Home](#)   [FAQ](#)   [Autopost](#)   [Bookmarklet](#)   [Custom Domains](#)   [Google Analytics](#)   [Ways to share](#)

**What is posterous?**

Posterous lets you post things online fast using email. You email us at [post@posterous.com](mailto:post@posterous.com) and we reply instantly with your new posterous blog.

If you can use email, you can have your own website to share thoughts and media with friends, family and the world.

**What can I send to posterous?**

You can attach any type of file and we'll post it along with the text of your email. We'll do smarter things for **photos**, **MP3's**, **documents** and **video** (both links AND files)

**What do you do when I attach photos to an email?**

If you attach one photo (of any size, even direct from your camera!), we'll resize it to a web-friendly size and post it. If you attach more than one photo in the same message, we automatically create a good looking image gallery like this one:

1 of 12

**What do you do when I attach music to an email?**

We'll drop the music into a web MP3 player so that your readers can listen to it right there in their web browsers.

[\(download\)](#)

**What do you do when I attach a video file to an email?**

We will transcode your video so that you can see the it in a flash player right there in your browser. We'll host the file too, so you don't have to do any work at all. Posterous is THE easiest way to post a video online using email.

[\(download\)](#)

We turn any URL into links. But we try to do smarter things when we can.

**Try posterous now.  
It's free and one  
click away.**

...or any other mail

program. Posterous works wherever you have email.
