

# Need to Show a YouTube Video at School?

(YouTube is BLOCKED! – How can you show the video?)

1. From Home... Go to YouTube and find the video that you want to download. In the URL address at the top of the YouTube page, add the work “kick” (no quotes) directly in front of the words “youtube” then press “Enter” – See example...

2. You will be directed to the KickYouTube site. On the bar at the top select the type of video you want to download (MP4 works well) and click on the green “GO” button.

3. The green “GO” button will change to a “DOWN” button to use for downloading. Right Click on the “Down” button and select “Save Target As” – Navigate to your flash drive to save a copy to bring to school! Enjoy!
