

Pyramid of Interventions Considerations

Intervention	Considerations
Goal	Is there a clear goal for the intervention that is agreed upon by all the members of the learning community? Is this goal connected to the assessment/metric/measure and the overall mission/vision of the school?
Systemic/Systematic Mission/Vision Connection	Is there shared organization wide agreement (systemic) that this intervention is critical to the mission of the school? Is there a flow chart or consideration of what (systematic) steps are necessary for a student to experience success? How is this intervention connected to the overall Pyramid of Interventions?
Research Based	What literature exists that supports the intervention as a “Best Practice?” Do all parties responsible for the intervention have access to this literature? Do example schools exist who have a story about this intervention?
Measure/Metric/Assessment	What data is being monitored to determine success of the intervention? When is it monitored? Is it timely enough to impact all who are struggling while there is still time to make a difference for the student’s current course? Is it formative or summative? How is it distributed to those who are responsible for the intervention? Does it tell us what we need to know to monitor, adjust, and effectively implement the intervention?
Target Students	Who is being targeted? How many? Do all the students in the target group have access to the intervention? How does the student know regarding their participation? How do the parents know?
Who is Responsible?	Is there a body/person whose job it is to ensure that the intervention/metric is launched, implemented, adjusted and monitored? Is there a clear repeatable, agreed to, written job description for that person? Is it reproducible?
Invitational or Directive?	Is participation an option (actively or passively) for targeted students? What happens if they don’t participate?
Resources	What will the intervention cost? Is there a budget available? What materials will be necessary? Who and how will the necessary materials be obtained?
Reproducibility	Is there a written description of the intervention? Can the program be duplicated at another site or another year? How might it be described to the community?
Flexibility	How does a student get into the intervention? How does a student exit the intervention? Is this entry/exit strategy clear to the students?
History/Tracking	How is each student tracked in the intervention? Is there a school-wide record of interventions implemented for each student? Does the record reflect what interventions worked and didn’t work for the student? Do all members of the learning community have access to the record of interventions? CUM file? SIS file? School Loop? Shared Data base? File cabinet?

POI Considerations Worksheet

Use the "POI Considerations" to evaluate each Intervention at your school

	Intervention
	Goal
	Mission/Vision
	Researched Base
	Metric
	Target Students
	Who is Responsible?
	Invitational or Directive?
	Resources
	Reproducibility
	Flexibility
	Tracking/ Monitoring
